

## What to Expect?

I am your TA (mentor for the team)

You will give a weekly progress report on your tasks individually

You have to manage your team yourselves. I only check in to see how it is going and take attendance

## What to avoid?

Missing the Labs. Why? We take weekly attendance of team members

Giving unclear documentation of your code.

If you fall sick please let the instructor know so he can exempt you from the absent lab list

Also, a team absence or lack of participation can affect the whole team
